

NORTH KILDONAN WARD

Jeff BROWATY - No response at this time.

Evan COMSTOCK - No response at this time.

Andrew PODOLECKI –

“A very serious issue that is facing our city, is the safety of motorists, pedestrians, cyclists, and children alike. The first priority is to teach safety at the heart of the system. Right from an early age all the way to adult years. To teach safety and the proper rules of all roads to all peoples from elementary school, to high-school and drivers education. We need to build the infrastructure with safety at its heart and knowledge. Teaching our kids and cyclists the importance of wearing helmets, reflect, bright clothing, proper reflecting light, as well as ensuring what is the proper procedure when crossing various intersections to ensure safety for all.

Active Transportation needs to be embraced by Winnipeg with further expansions and education for motorists as well. To have respect all over to ensure a better system for all. With this in mind, i hope to bring together, school divisions, MPI, the city, and the province together to education on the importance of safety for cyclists and motorists alike to ensure safety is secured for all. Whether if it's something simple like a bike-helmet, or demerits on a driver's license for breaking the rules of the road concerning cyclists. We need to be together at the table to hash out these ideas to ensure we have the proper safety ones.”
