

RIVER HEIGHTS – FORT GARRY WARD

John ORLIKOW - No response at this time.

Taz STUART

“Transportation is one of the top priorities for me as per my website tazstuart.ca. Without effective manageable transportation the city cannot continue to grow efficiently. This includes both safe walking and biking routes throughout all of Winnipeg. This also means that safety still has to be paramount which is the top priority. Given the recent speed reduction for school zones, this step alone has increased children's safety during school day operations. Children are much safer than they have been in the past because of education and awareness, but on the other side, I feel more seniors are at risk as well, so these programs also have to be directed to that demographic as their safety on the transportation routes is also extremely important. Continuing to build on the existing public awareness campaign is key. “
