Curricular Connections (Green Action Centre)

Appendix B:
Search Terms

Appendix B: Search Terms

Terms for Prevention of Food Waste Search:

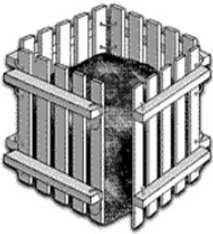

The words, listed below, were used to search for possible curricular connections to prevention of food waste.

carbon (including carbon cycle, carbon dioxide)	life cycle
climate change	landfill
cradle to cradle	manure
compost	methane
composting	nutrients
decompose	nutrition
disposal	organic
dump	package
environment (including environmental footprint)	packaging
farming	peelings
fertilizer	procurement
food (including food chain, food disposal, food scraps, food loss, food waste)	recycle
footprint	reduce
global warming	replace
grocery	reuse
green house (including greenhouse gases)	sustainable (including sustainable development, sustainability)
harvest	waste
humus	worms

Appendix: C - Permission

The following is part of an email sent by Teresa Prokopanko to John Perry with a subject heading of Re: Request regarding Green Manitoba Schools Compost materials. The e-mail was sent on February 22, 2019.

The email gives permission to consult a School Yard Composting Project and The Nutrients for Life Project previously developed by John Perry.

Thank you Chris, I appreciate this very much!

John, this is confirmation that we can use the curriculum linkages document on composting as discussed.

Teresa

Hi Teresa,

I confirm that Green Action Centre and John Perry has permission to use the curriculum linkages information that John Perry researched and provided related to the Schools Compost projects and/or the Nutrients for Life project. Ask John which file he is looking for and I will see if it is still available. Cheers, Chris

Background Information

Prevention of Food Waste in Schools: K-12 Potential Manitoba SLO Curricular Connections-

Appendix D; Background Information

The following is part of an email sent by Teresa Prokopanko to John Perry with a subject heading of Re: Curriculum Links Contract for Green Action Centre. The e-mail was sent on February 6, 2019.

The email mentions that there are plans to translate resources into an indigenous language.

Hi John,

I'm glad we could connect this morning!

Here's some more information on the project to help you identify your key words. We're creating a web-based quiz, and will also be posting a waste audit lesson plan (created for a previous project so I'm attaching it here). While there's also a presentation component to this project, it's not created yet nor is it available to everybody, so we'll just leave any of that out of the curriculum links.

Please let me know if you need anything else or have any questions!

The Food Waste Prevention in Schools project will provide resources and programming to increase awareness and support climate action on food waste prevention. This pilot project will focus Manitoban school teachers and targeted school children in Manitoba. Part of the outputs of this project will be to create an online interactive food waste game tailored to school-aged children and made available on Green Action Centre's website. Other resources for teachers such as a waste audit lesson plan and curriculum connections will be made available. All resources developed will be translated in French and a minimum of one Indigenous language spoken widely in Manitoba to extend the reach of the resources. These resources will be brought to life with a newly developed food waste prevention presentation that will be delivered to school children in 7 targeted schools in Manitoba. One important goal of the project is for the students that acquire new food waste prevention knowledge to commit to a concrete action to reduce their personal food waste.
