

DECORATE YOUR BIKE

DIY STREAMERS

What you'll need: Ribbons, strips of fabric, or strips of paper (the longer the better!), an elastic band or hair tie. Optional: a hot glue gun

Step 1: Gather your ribbons, fabric, or paper. Don't have any? Recycle some paper or clean plastic/foil packaging from your garbage or recycling bin and cut it into long strips. A colourful chip bag works great!

Step 2: Tie your strips onto your elastic band. If you're using paper, gluing them together will work better than tying - ask an adult for help!

Step 3: Wrap your elastic band around the ends of your handlebars. Voila - you just made yourself a set of streamers!

**BIKE EVERYWHERE
MONTH**

WHEEL FUN

What you'll need: Pipe cleaners, ribbons, colourful tape, etc.

Take some pipe cleaners or colourful tape and wind them around the spokes on your wheels. Add as much colour as you want and watch the cool patterns they make when they are rolling!

Don't use anything too big or dangly - you don't want them to get tangled while you're riding!

FRAME IT

What you'll need: Fabric, paper, flowers, tape, string, anything goes!

Take some colourful paper or fabric and wrap it around the frame on your bike. Tape it, glue it, tie it, it's up to you!

For some extra springtime fun, find some flowers or dandelions and tie them to your bike. Always remember to ask first before picking flowers out of someone's yard!
